A complete business toolkit in one app

Most cleaning business owners juggle notebooks, WhatsApp messages and guesswork to price jobs, chase clients and track money. Cleaning Calculator Pro brings it all into one place. You work out a profitable price, send a branded quote, collect payment with an invoice, prove the work with before-and-after photos, follow up on clients who haven't replied, and see how your business is doing each month. For bigger contracts, it writes a full commercial cleaning proposal.

CHAPTER 01

What Cleaning Calculator Pro is

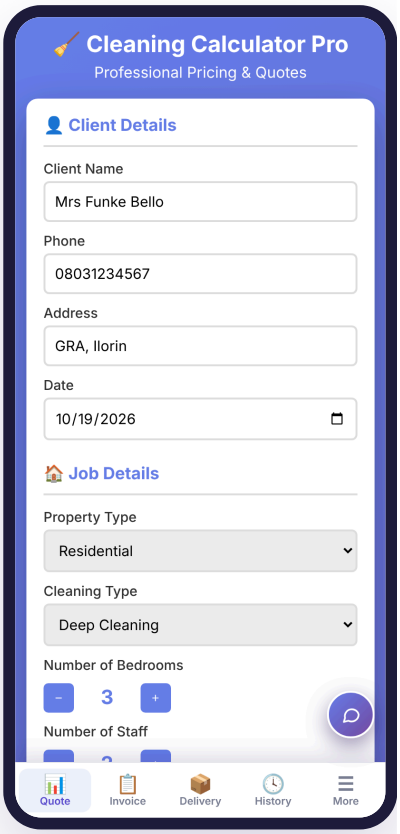

A pricing, quoting and business-management app for cleaning companies. It runs in the phone's web browser, installs on the home screen like a normal app, and keeps working without internet.

Who it's for

- Cleaning business owners who want to stop under-charging and price every job with confidence.
- New cleaning businesses that need to look professional from the first quote.
- Growing companies bidding for office, estate, hotel, school or healthcare contracts.
- Cleaning businesses across Africa. It supports **26 currencies**, from the Naira, Cedi and Shilling to both CFA Francs.

What makes it different

- **Your costs stay private.** You see the staff, materials, transport and profit breakdown; your client only sees what's included and the price.
- **Everything is branded.** Your logo, business name, bank details, terms and signature appear on every quote, invoice and report.
- **WhatsApp-first.** Quotes, invoices, delivery reports, review requests and follow-ups go out on WhatsApp in one tap.
- **Works offline.** Once opened, it keeps working without data. Your records are saved on your own device.

The Calculator on a phone, with the bottom menu bar

The nine main areas

⚙️ Setup
Business details, logo, currency, bank, terms, signature, review message, backup.

💰 Pricing
Your private costs for every cleaning type, plus editable service descriptions.

📊 Calculator
Works out the price and builds the client's quote, including multi-service quotes.

📋 Invoice
Records payments, shows the balance due and keeps an invoice history.

📦 Delivery
Before-and-after photo reports and one-tap review requests.

🕓 History
Saved quotes and invoices, quote status and follow-up reminders.

📈 Dashboard
Money quoted, jobs won, revenue, balances owed and follow-ups due.

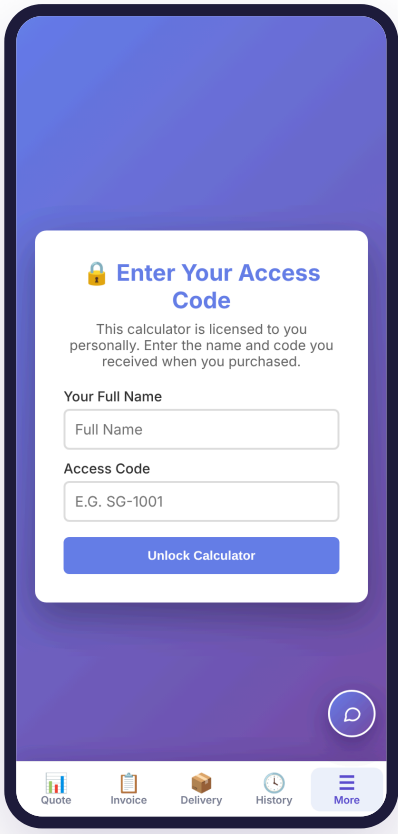

📑 Proposals
Guided commercial cleaning proposals with an A4 PDF.

💬 Support
Quick answers and a message form, built into the app.

CHAPTER 02

Getting started

The app is personal to each buyer. You unlock it once with your name and access code; after that it opens straight away on that device.

The unlock screen

Unlocking the app

1. Open the calculator link you received after purchase.
2. Enter your full name and the access code. Capital or small letters don't matter.
3. Tap **Unlock Calculator**. Your name appears as "Licensed to" on computers.

Install it like an app

In Chrome on Android, tap the ⋮ menu → **Add to Home screen** (or **Install app**). On iPhone, tap Share → **Add to Home Screen**. It then opens full-screen with its own icon, and works offline.

Finding your way around

On a phone, the **bottom menu bar** gives one-tap access to **Quote**, **Invoice**, **Delivery** and **History**. **More** opens the Dashboard, Proposals, Setup and Pricing. A red badge on History shows when clients are due a follow-up. On a computer, the same sections appear as tabs across the top.

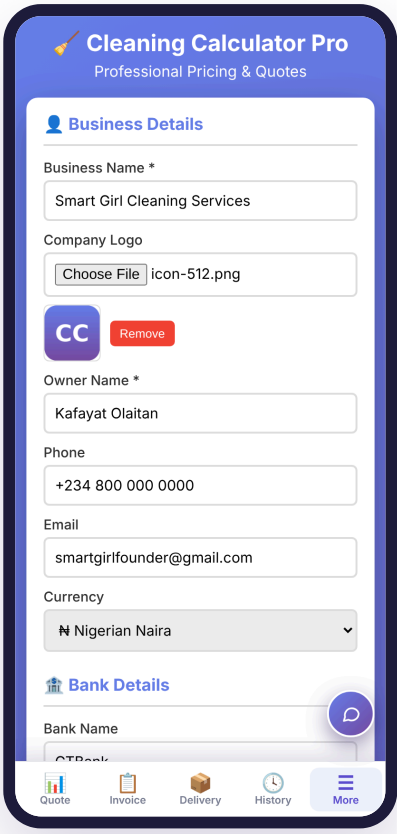

Recommended first steps

- Fill in **Setup** once: business name, logo, currency, bank details.
- Enter your real costs in **Pricing**.
- Price your first job in the **Calculator**.

CHAPTER 03

Setup: your business, your brand

Fill this in once. Everything is saved on the device and used automatically on every quote, invoice, delivery report and proposal.

Setup with logo and business details

Business details

- **Business name and owner name**, shown at the top of every document.
- **Company logo upload**, shown on quotes, invoices, delivery reports and the proposal cover.
- **Phone and email.**
- **Currency:** choose from 26 African currencies. Every amount, label and document updates instantly.

Getting paid

- **Bank details** (bank, account name, number) printed on quotes and invoices.
- **Down payment %** (40% by default). The quote shows exactly how much secures the booking.

Protecting your business

- **Terms & Conditions:** ten ready-written, fully editable terms covering booking confirmation, balance payment, cancellations, complaints window, access and utilities, valuables, scope of work and more. Switch them on or off for quotes.
- **Authorised signature:** type your name for a handwritten-style signature, or upload a photo of your real signature.

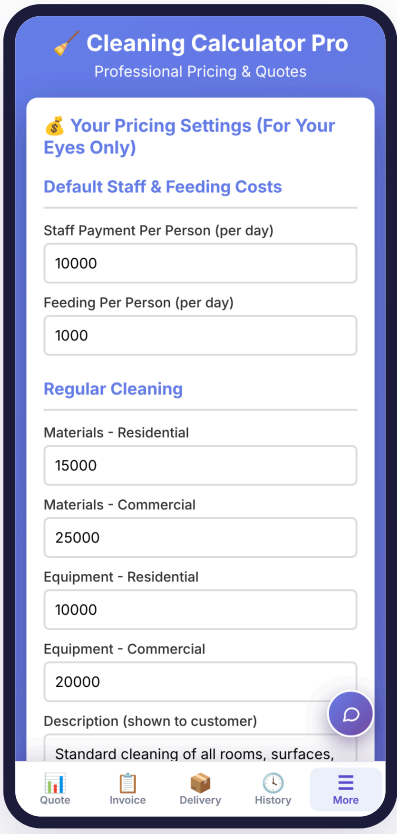

Reviews

- An editable **review request message** that fills in your business and client name automatically.
- An optional **Google review link**, added to the message for you.

CHAPTER 04

Pricing: your private cost engine

This is where you teach the calculator what your business really spends. It's labelled "For Your Eyes Only" because clients never see these numbers.

Private pricing settings

Default staff costs

Staff pay per person per day and feeding per person per day. These are used for every job.

Costs for each cleaning type

For each service you set **materials** and **equipment** costs, separately for **residential** and **commercial** jobs:

Service	Special pricing
Regular Cleaning	Scales with number of bedrooms
Deep Cleaning	Scales with number of bedrooms
Post-Construction	Scales with number of bedrooms
Move-In / Move-Out	Scales with number of bedrooms
Upholstery	Price per seater
Carpet Cleaning	Feet-to-square-metre converter for several carpets
Fumigation	Chemicals and equipment costs
Custom / Specific Space	Default rates for staircases, balconies, single rooms; editable per job

Your wording, your checklist

Each service has an editable **description** and **"What's Included" checklist**. Change them to match exactly how your team works, and every quote uses your wording.

CHAPTER 05

The Calculator and professional quotes

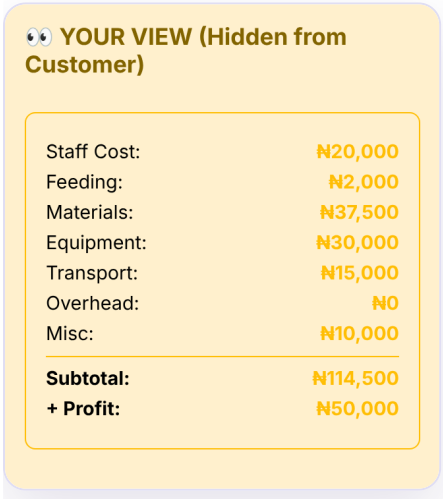

Enter the job details and the calculator works out a price that covers every cost and your profit. It builds a branded quote alongside as you type.

What you enter

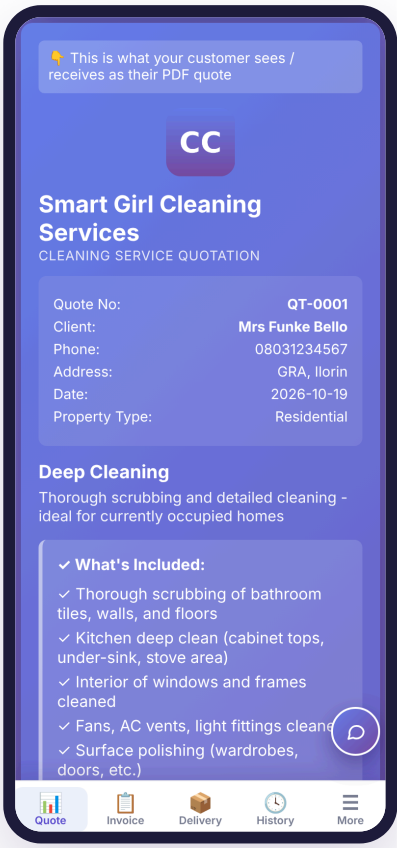

- **Client details:** name, phone, address, date.
- **Property type:** residential or commercial.
- **Cleaning type:** 8 types, including a fully custom job with your own title, description, task list and costs.
- **Job size:** bedrooms, number of seaters (upholstery) or carpet size in square metres.
- **Number of staff and number of days**, with simple + / – buttons.
- **Difficulty multiplier:** raise it (e.g. 1.3) for very dirty or hard-to-reach jobs so staff cost rises fairly.
- **Transport, overhead, miscellaneous and profit / service charge.**

"Your view": hidden from the customer

A private breakdown of staff, feeding, materials, equipment, transport, overhead, miscellaneous, subtotal and profit. You always know your margin.

Private cost breakdown

The quote your client receives

What the client's quote shows

Your logo and business name, an automatic **quote number** (QT-0001…), client details, the service description and "What's Included" checklist, the total and the **down payment** that confirms the booking, bank details, your Terms & Conditions and your signature.

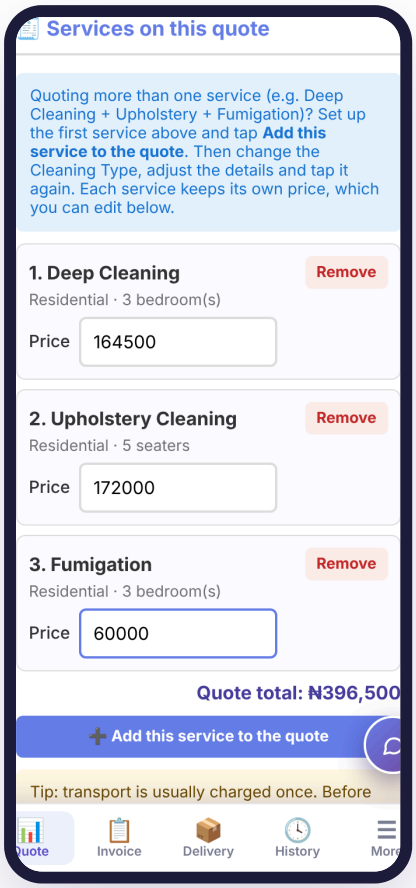

Send it in seconds

📄 **Print / Save PDF** saves a clean PDF quote. 💬 **Share via WhatsApp** sends a neatly formatted text quote. 💾 **Save to History** keeps it for follow-up, reloading and invoicing.

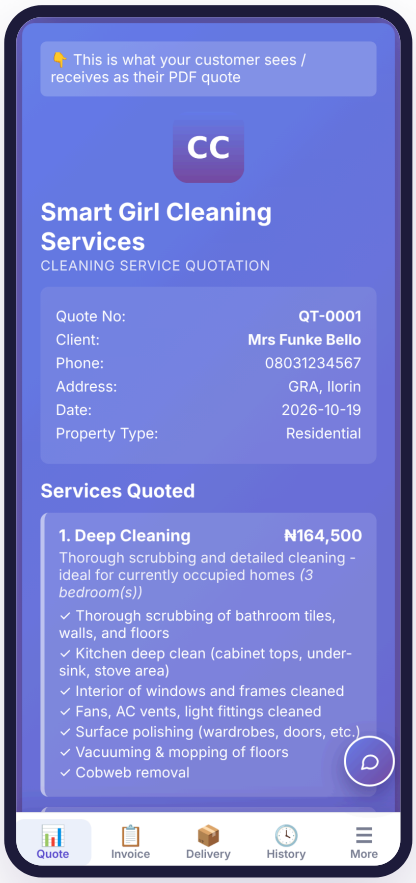

CHAPTER 06

Multi-service (itemised) quotes

Clients often want more than one service: a deep clean, the sofas done and the house fumigated. Put them all in **one quote**, each with its own price.

"Services on this quote": each with an editable price

The client sees each service, its price and checklist

How it works

1. Set up the first service in the Calculator (e.g. Deep Cleaning, 3 bedrooms).
2. Tap ➕ **Add this service to the quote**.
3. Change the Cleaning Type (e.g. Upholstery, 5 seaters), adjust the details and tap Add again. Repeat for Fumigation.
4. Edit any price directly in the list if you want to round it or give a package discount.
5. The total, down payment, WhatsApp message, saved quote and invoice all use the combined total.
6. Tap 🆕 **Start a New Quote** when you're ready for the next client.

Tip

Transport is usually charged once. Before adding the second and third service, set Transportation to 0 if it's already included in the first.

CHAPTER 07

Invoices and part payments

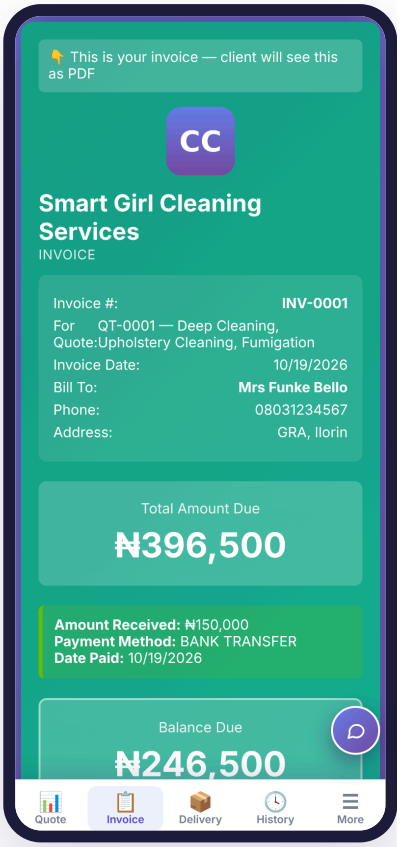

When the client pays, whether the down payment or the full amount, turn the quote into an invoice in two taps.

What the invoice does

- **Automatic numbering:** INV-0001, INV-0002 … filled in for you.
- **Load from Calculator** brings in the client and total from the quote, including multi-service totals.
- Records **amount received**, **payment method** (cash, transfer, mobile money, cheque, mixed) and **date paid**.
- Calculates the **balance due** automatically, so it's ideal for part payments.
- Shows which **quote it belongs to** and which services were bought.
- Labels and amounts always use **your chosen currency**.
- Includes payment terms, bank details, terms and your signature.

Invoice history

Every invoice you generate is saved automatically. Open History → **Invoices** to see who has paid in full and who still owes a balance, and reopen any invoice to reprint or resend it.

Invoice with balance due

Automatic "job won"

Invoicing a quote marks that quote as **Accepted**, so your win rate on the Dashboard stays accurate without extra work.

CHAPTER 08

Delivery reports and reviews

Show your client the difference you made, and turn happy clients into reviews while they're happy.

Before-and-after report

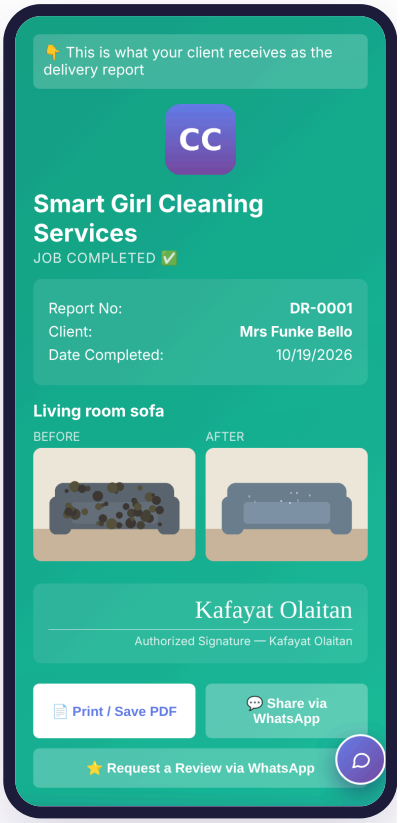

- Up to **5 before-and-after photo pairs**, each with its own label (e.g. "Living room sofa").
- An automatic **report number** (DR-0001 ...), completion date, your logo and signature.
- Print or save as PDF, or share on WhatsApp.

One-tap review request

⭐ **Request a Review via WhatsApp** opens a chat with your client and your personalised thank-you message ready to send. It includes your Google review link if you've added one in Setup.

Why it matters

Before-and-after proof builds trust, justifies your price and gives you ready-made content for TikTok, Instagram and WhatsApp Status, with your client's permission.

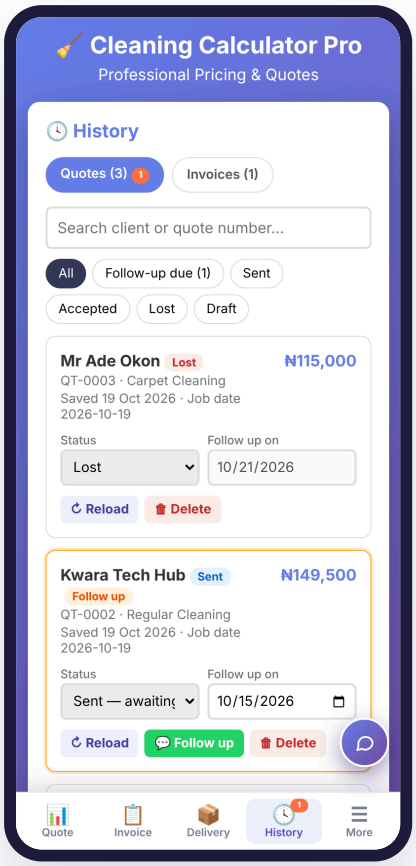

A delivery report with before-and-after photos

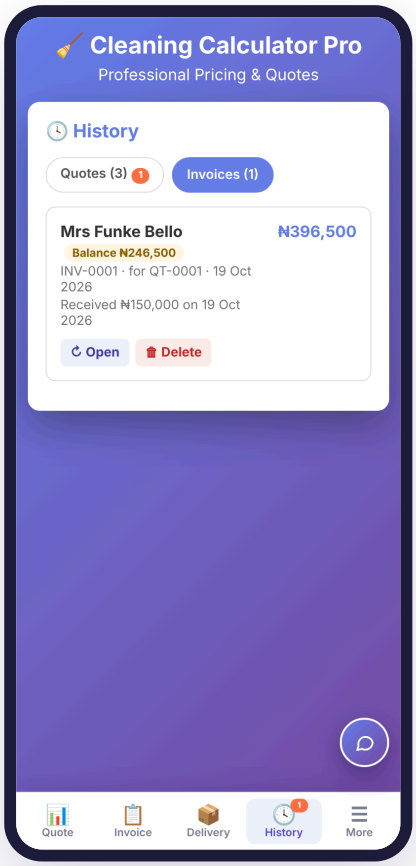

CHAPTER 09

History and the follow-up tracker

Most clients don't say yes on the first message. The follow-up tracker makes sure no quote is forgotten.

Saved quotes with status and follow-up dates

Saved invoices with balances owed

Every saved quote shows

- Quote number, client, services, total and the date saved.
- **Status:** Draft, Sent (awaiting reply), Accepted (job won) or Lost.
- **Follow-up date:** set automatically three days after saving, and changeable.
- 💬 **Follow up** opens WhatsApp with a polite message naming the quote, date, services and price, then schedules the next reminder.
- ↻ **Reload** brings the quote back into the Calculator, including every service, to edit, resend or invoice.

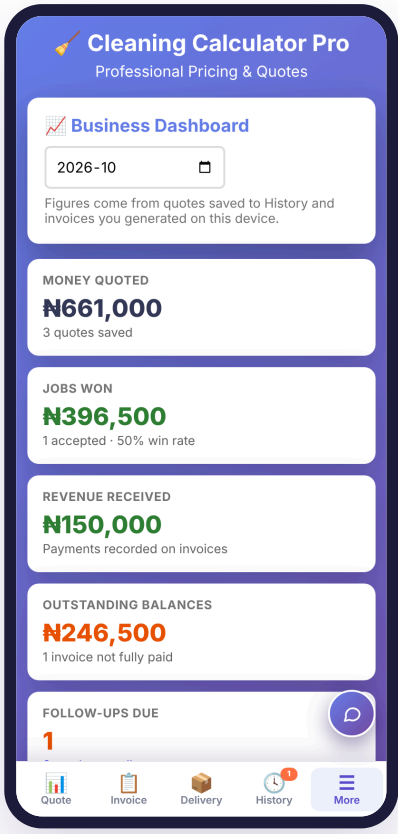

Search by client name or quote number, and filter by **Follow-up due**, Sent, Accepted, Lost or Draft. Quotes due for a follow-up are highlighted, and a red badge shows on the History button.

CHAPTER 10

The business dashboard

Your business at a glance, month by month, built from the quotes and invoices you already create.

Figure	What it tells you
Money quoted	Total value of quotes saved that month, and how many
Jobs won	Value of accepted quotes, plus your win rate
Revenue received	Money actually paid in, from your invoices
Outstanding balances	What clients still owe you, across all invoices
Follow-ups due	Clients waiting for a call, with a link straight to them
Proposals	Commercial proposals created and finalised that month
6-month revenue chart	Whether your income is growing

The business dashboard

Pick any month from the month selector to look back at past performance.

Use it weekly

Check follow-ups due every Monday, chase outstanding balances, and compare money quoted with jobs won. A low win rate means it's time to review your pricing or follow-up habit.

CHAPTER 11

The Proposal Generator

For contracts, quotes aren't enough. Offices, estates, hotels, schools and hospitals expect a proper **commercial cleaning proposal**. The Proposal Generator guides you through the questions an experienced bidder would ask, then writes a complete, professional proposal you can edit and export as an A4 PDF.

1. Choose the facility: 26 types

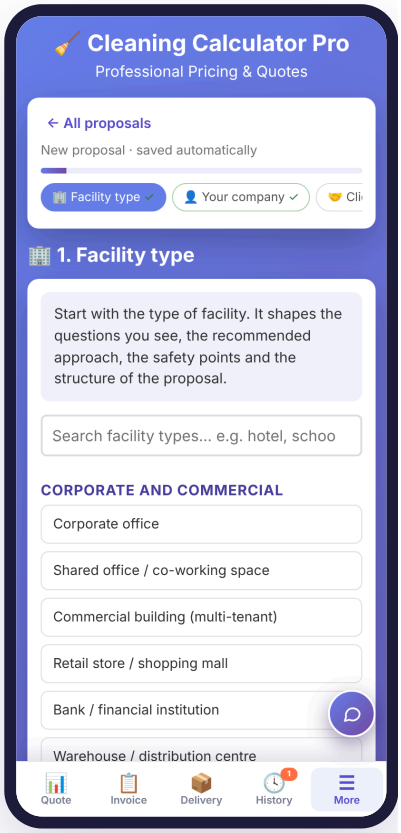

Corporate offices, shared offices, commercial buildings, retail and malls, banks, warehouses, industrial sites, schools, government buildings, churches and event centres, hotels, short-lets, serviced apartments, restaurants, residential estates, property portfolios, hospitals, clinics, dental practices, laboratories, gyms, recreational facilities, transport terminals, newly built buildings, or your own description.

The facility type changes the questions you're asked, the recommended approach and the safety points. For example, a hotel asks about room turnover and linen, a school about pupils' ages and holiday deep cleans, and a clinic about clinical areas and infection-prevention contacts.

2. Answer 12 guided steps

Facility type → your company → client and opportunity → facility profile → challenges and goals → services and scope → staffing → quality and KPIs → health and safety → pricing and terms → extra instructions → check and generate.

A progress bar shows where you are, and everything saves automatically. You can import a client and price from a saved quote, and leave unknown details blank instead of guessing.

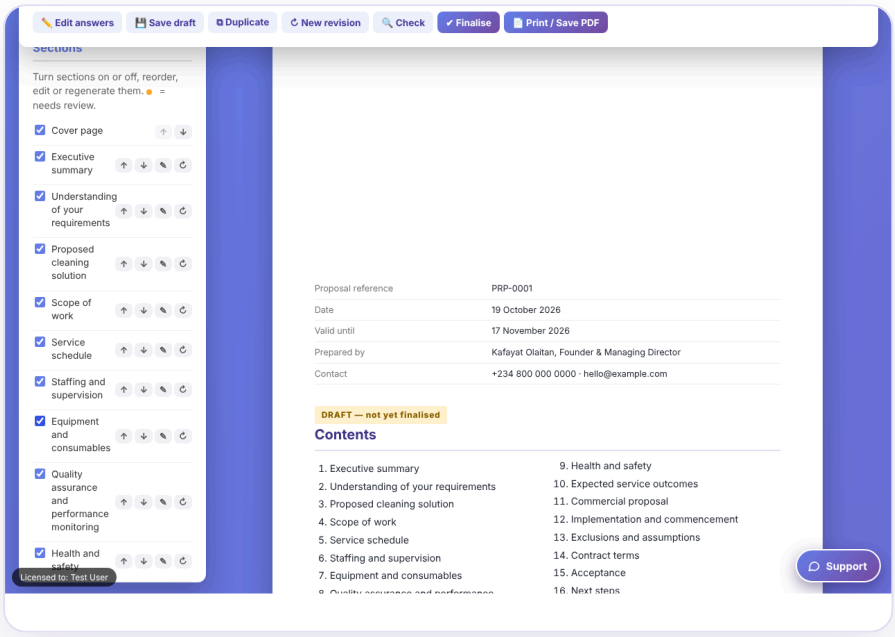

Choosing the facility type

3. It thinks before it writes

- **Problem → solution mapping:** each challenge the client mentioned (dirty washrooms, missed tasks, no supervision, dust…) is matched to a specific response and service.
- **Missing information check:** separates what must be fixed, what affects price or credibility, and what's optional, each with a "Fix →" link.
- **Conflict check:** catches contradictions, such as a one-off price with a 6-month contract, or payment stages that don't add up to 100%.
- **Suggested staffing:** if you're unsure how many cleaners you need, it suggests an approach from the floor area and time window, shows its assumptions, and uses it only if you approve.
- **Optional extras:** recommends related services, which are added only if you choose, and labelled "optional".

4. A complete proposal with up to 17 sections

Cover page · Executive summary · Understanding of requirements · Proposed solution · Scope of work · Service schedule · Staffing and supervision · Equipment and consumables · Quality assurance and KPIs · Health and safety · Expected outcomes · Commercial proposal · Implementation · Exclusions and assumptions · Contract terms · Acceptance (signature page) · Next steps.

The review workspace: turn sections on or off, reorder, edit, regenerate, check, finalise and export

Edit, revise, finalise

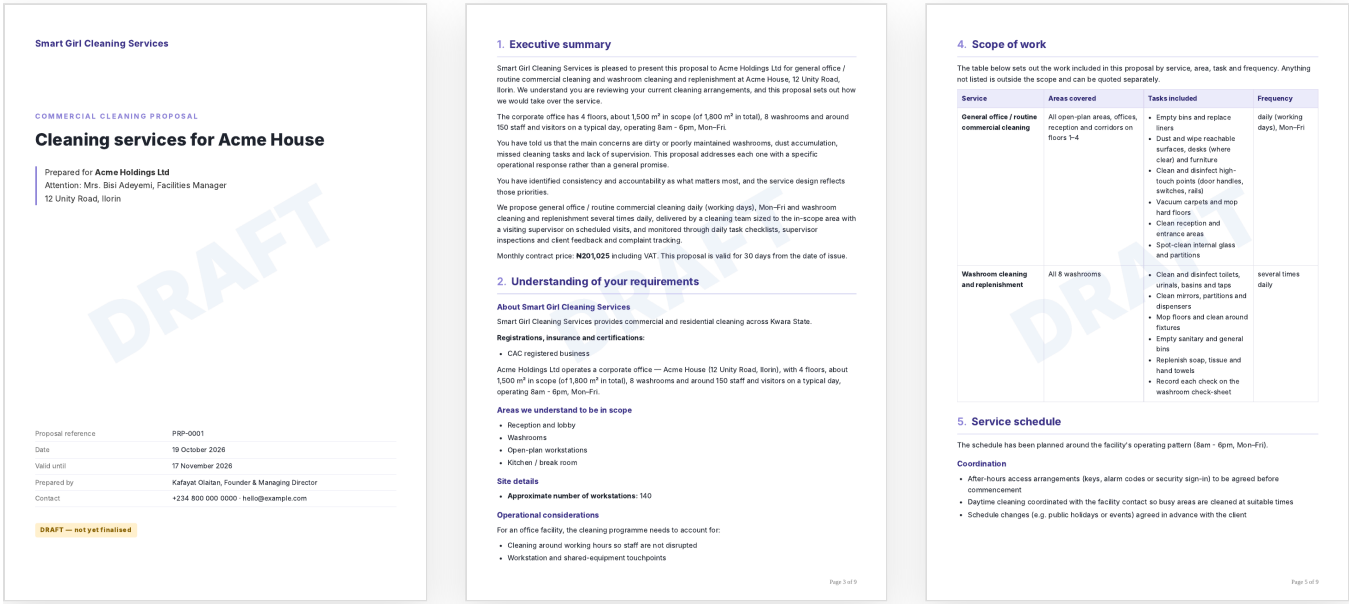

- Edit any section's wording, or regenerate just one section.
- Save drafts, duplicate for a similar client, or create Revision 2, 3….
- Finalise to lock the proposal; drafts print with a "DRAFT" watermark.
- Automatic numbering: PRP-0001…

Built-in honesty checks

- Never invents experience, certificates, insurance or complaints.
- Credentials appear only if you confirm you have evidence.
- Flags "guarantee", "100%", wrong currencies and prices that don't match.
- KPIs show as "Proposed" until the client agrees them.

5. The finished A4 proposal

A clean, professional document with your logo, a cover page, a contents page, numbered sections, scope and price tables, page numbers and an acceptance page for the client's signature. Save it as a PDF from the **Print / Save PDF** button.

Smart Girl Cleaning Services

COMMERCIAL CLEANING PROPOSAL

Cleaning services for Acme House

Prepared for **Acme Holdings Ltd**
Attention: Mrs. Bisi Adeyemi, Facilities Manager
12 Unity Road, Ilorin

DRAFT

Proposal reference	PRP-0001
Date	19 October 2026
Valid until	17 November 2026
Prepared by	Kafayat Olaitan, Founder & Managing Director
Contact	+234 800 000 0000 · hello@example.com

DRAFT — not yet finalised

1. Executive summary

Smart Girl Cleaning Services is pleased to present this proposal to Acme Holdings Ltd for general office / routine commercial cleaning and washroom cleaning and replenishment at Acme House, 12 Unity Road, Ilorin. We understand you are reviewing your current cleaning arrangements, and this proposal sets out how we would take over the service.

The corporate office has 4 floors, about 1,500 m² in scope (of 1,800 m² in total), 8 washrooms and around 150 staff and visitors on a typical day, operating 8am - 6pm, Mon–Fri.

You have told us that the main concerns are dirty or poorly maintained washrooms, dust accumulation, missed cleaning tasks and lack of supervision. This proposal addresses each one with a specific operational response rather than a general promise.

You have identified consistency and accountability as what matters most, and the service design reflects those priorities.

We propose general office / routine commercial cleaning daily (working days), Mon–Fri and washroom cleaning and replenishment several times daily, delivered by a cleaning team sized to the in-scope area with a visiting supervisor on scheduled visits, and monitored through daily task checklists, supervisor inspections and client feedback and complaint tracking.

Monthly contract price: **N201,025** including VAT. This proposal is valid for 30 days from the date of issue.

2. Understanding of your requirements

About Smart Girl Cleaning Services

Smart Girl Cleaning Services provides commercial and residential cleaning across Kwara State.

Registrations, insurance and certifications:

- CAC registered business

Acme Holdings Ltd operates a corporate office — Acme House (12 Unity Road, Ilorin), with 4 floors, about 1,500 m² in scope (of 1,800 m² in total), 8 washrooms and around 150 staff and visitors on a typical day, operating 8am - 6pm, Mon–Fri.

Areas we understand to be in scope

- Reception and lobby
- Washrooms
- Open-plan workstations
- Kitchen / break room

Site details

- **Approximate number of workstations:** 140

Operational considerations

For an office facility, the cleaning programme needs to account for:

- Cleaning around working hours so staff are not disrupted
- Workstation and shared-equipment touchpoints

Page 3 of 9

4. Scope of work

The table below sets out the work included in this proposal by service, area, task and frequency. Anything not listed is outside the scope and can be quoted separately.

Service	Areas covered	Tasks included	Frequency
General office / routine commercial cleaning	All open-plan areas, offices, reception and corridors on floors 1–4	• Empty bins and replace liners • Dust and wipe reachable surfaces, desks (where clear) and furniture • Clean and disinfect high-touch points (door handles, switches, rails) • Vacuum carpets and mop hard floors • Clean reception and entrance areas • Spot-clean internal glass and partitions	daily (working days), Mon–Fri
Washroom cleaning and replenishment	All 8 washrooms	• Clean and disinfect toilets, urinals, basins and taps • Clean mirrors, partitions and dispensers • Mop floors and clean around fixtures • Empty sanitary and general bins • Replenish soap, tissue and hand towels • Record each check on the washroom check-sheet	several times daily

5. Service schedule

The schedule has been planned around the facility's operating pattern (8am - 6pm, Mon–Fri).

Coordination

- After-hours access arrangements (keys, alarm codes or security sign-in) to be agreed before commencement
- Daytime cleaning coordinated with the facility contact so busy areas are cleaned at suitable times
- Schedule changes (e.g. public holidays or events) agreed in advance with the client

Page 5 of 9

Sample pages from a proposal for a corporate office (demo data)

Works without AI, with an optional AI upgrade

The built-in writer produces a complete proposal from your answers, works offline and costs nothing. An optional AI writing feature can be switched on by the app owner to make the narrative sections more natural. Prices, scope and tables always come straight from your answers either way.

CHAPTER 12

Backup, privacy and offline use

Your data stays with you

Quotes, invoices, proposals and settings are saved **on your own phone or computer**, not on someone else's server. Your private costs and profit margins are never shown to clients.

Backup & Restore

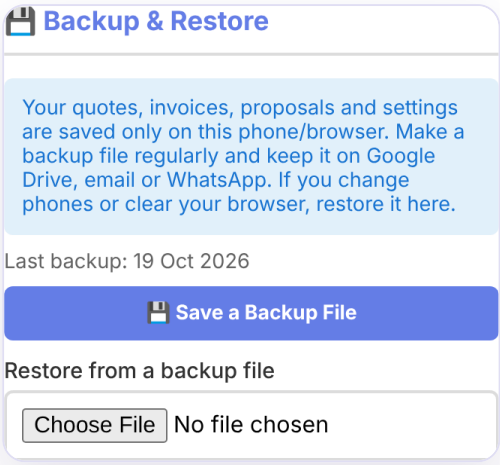

- 💾 **Save a Backup File** puts everything into one file: settings, logo, signature, quotes, invoices, proposals and numbering. On Android you can send it straight to Google Drive, email or your own WhatsApp chat.
- **Restore** on a new phone or after clearing the browser. Records are **combined**, so nothing already on the device is deleted.
- A friendly reminder appears if you haven't backed up in two weeks.

Works offline

After the first visit, the app keeps working without internet: pricing, quotes, invoices, delivery reports, history, dashboard and proposals. Updates arrive automatically the next time you're online.

Good habit

Make a backup every week, and always before changing phones or clearing your browser data.

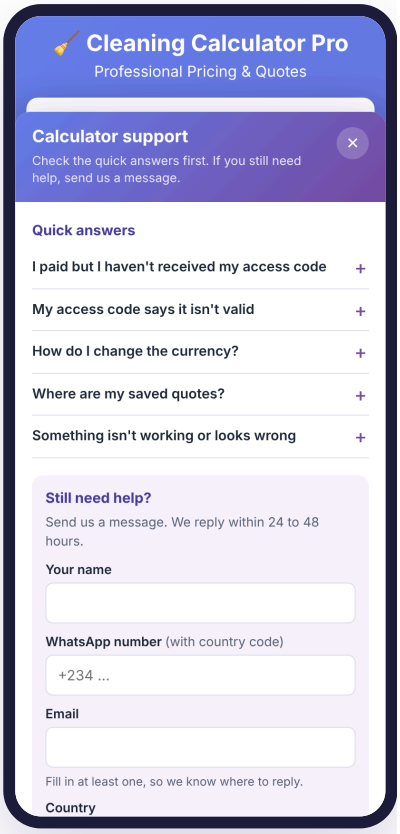

Backup & Restore in Setup

CHAPTER 13

Help and support

Help is built into every screen through the round **Support** button.

- **Quick answers** to common questions: access codes, changing currency, finding saved quotes and more.
- **Send a message:** name, WhatsApp number or email, country, issue type, message and an optional screenshot.
- A reply within **24–48 hours**.

The support panel

CHAPTER 14

Quick reference

Automatic numbering

Document	Format	When the number is used
Quote	QT-0001	Shown on every quote; kept when you save it to History
Invoice	INV-0001	Filled in automatically; the next number is ready after each invoice
Delivery report	DR-0001	Given when the report is generated
Proposal	PRP-0001	Given when a new proposal or duplicate is created

The everyday workflow

1. **Quote:** price the job (add more services if needed) → share on WhatsApp → Save to History.
2. **Follow up:** when History shows a red badge, tap 💬 Follow up.
3. **Invoice:** when the client pays, Load from Calculator (or Reload the quote from History) → Generate Invoice.
4. **Deliver:** after the job, add before-and-after photos → share the report → request a review.
5. **Review:** check the Dashboard each week, and back up your data.

Frequently asked questions

Can my client see my costs?	No. Only the services, what's included and the price appear on documents.
Can I use it outside Nigeria?	Yes. Choose from 26 African currencies in Setup.
Do I need data to use it?	Only to open it the first time and to receive updates. It works offline after that.
Where are my saved quotes?	In History, on the device and browser you used. Back up to move them.
Can I quote several services together?	Yes. Use "Add this service to the quote" in the Calculator.
Can I change the wording on quotes?	Yes. Edit each service's description and checklist in Pricing.

Price with confidence. Look professional. Grow on purpose.

Cleaning Calculator Pro was built by a cleaning business owner for cleaning business owners: to stop guesswork, win better clients and make every job profitable.
